

# Medical Sharps Disposal

Community sharps can be disposed of safely at these pharmacies in the northern end of the Central Coast.

Community sharps such as syringes, needles or lancets used for medical conditions need to be disposed of correctly to ensure the safety of Council staff, contractors and the general public. They need to be placed in a puncture proof container for disposal at a participating pharmacy.

Community sharps are not accepted in the mainstream waste and recycling bins, nor on kerbside collections.

Check out [www.safesharps.org.au](http://www.safesharps.org.au) to locate a disposal point near you
